

Callouts

INFLUENCE OUTCOMES BY SHARING RELEVANT PATIENT/MEMBER INFORMATION

Callouts gives you a single digital channel to share contextual patient/member information with point-of-care clinicians and care managers through Pings and Stories. As a health plan, accountable care organization, or any entity accepting financial risk for patient care, you can influence outcomes such as post-discharge referrals, preventable admissions, and enrollment in care programs through “nudges” embedded in user workflows.

Bamboo Health operates entirely within the privacy and security requirements set forth with HIPAA, including the encryption of all data in transit and at rest. Our Callouts solution is also HITRUST CSF® Certified, meeting industry-defined standards when it comes to managing risk.

Communicate Critical Information to Clinicians

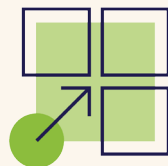

- Direct in-network referrals post-discharge by sharing referral instructions with discharge coordinators.
- Share patient or member care plans to inform clinicians at the point of care to improve outcomes.
- Enroll members into care management and LTSS programs by activating the care team during a medical episode.

Features

CARE PROGRAMS

Enroll patients and connect them to available care management programs.

CARE PLAN ACCESS

Share and have access to a patient's comprehensive care plan.

RISK FLAGS

When patients present at the emergency department, alert relevant parties of key risks.
